23 July 2012

Dear Rob Moore (GOOD EARTH FEEDS PTY LTD)

We fed your fenugreek products (Nutrifen®) to our pregnant mares in our 2011 season (put in foal in 2010 and foaling in 2011). We fed it to our mares not only during their pregnancy but also after the foals were born. This is a period of about 15 months. From our testing we found that the mares' general well-being has improved and we also experienced less health problems with our foals.

We also fed your fenugreek products to our yearlings in preparation for the sales. We found that it kept them in excellent condition. We saw a remarkable improvement in their coat and hoof quality.

We also found that the healing time of wounds reduced remarkably.

We would like to thank you for introducing us to your excellent product and for achieving such positive results.

Regards
